

QUALITY, HEALTH, SAFETY AND ENVIRONMENT (QHSE) POLICY

We, the Management and employees of Keppel Sea Scan, are committed to providing Customized Value-added Solutions to our customers, through Superior Quality Works, High Safety and Environmental Standards, within Budget and on Schedule, unmatched by the competition.

We recognize our individual and collective obligations and responsibility to conduct our business operations in a manner which protects people, the environment and property, and pledge to conform to all applicable legislations, regulatory or other requirements from our customers & the authorities.

In this regard, we shall, as far as reasonably practicable,

- Implement a safety management system to incorporate risk management, health & safety programmes and employee involvement to prevent injuries and ill health at all work sites
- Implement measures to reduce/eliminate adverse impact to the environment from our operations including prevention of pollution
- Implement measures to eliminate hazards and reduce OH&S risks
- Continually promote consultation and participation of workers, and, where they exist, workers' representatives
- Continually upgrade the skills of our workforce and enhance effectiveness of work
- Continually improve on the performance and effectiveness of our QHSE system through regular review, monitoring and measurement
- Continually improve the quality of our products & services and ensure that quality is not compromised to meet other targets
- Continually communicate and promote QHSE awareness and training to all employees and interested parties
- Consider all terrorism threats and make the workplace secure from security threat
